

REEFPROJECT2.0[©]

— A DIVISION OF WALT SMITH INTERNATIONAL —

Helping the ADE Project:

What happens when you bring the most revolutionary pioneer in marine aquaculture together with a group of insightful philanthropists to ponder the question of solving one of nature's biggest problems?

You get a program greater than anything ever attempted in ocean science. This program will benefit local economies in developing countries and advance our universal understanding of workable solutions to mitigate 3rd world poverty and environmental decline.

Welcome to the world of **REEFPROJECT2.0**

The time is now! Nature can't wait!

Introducing ReefRock2.1 — the first product born to capture the eco-friendly and sustainable spirit of our industry.

The time has come to accept that there are realistic alternatives to your choices that support the ideal combination of scientific research and sustainable development. Our time has come! Your time is now! Act before we have to ask ourselves the question *"Did we wake up soon enough or did we all just wake up together too late?"*

Believe, invest and participate in the most advanced sustainable product our industry has to offer brought to you by Walt Smith.

Every purchase of this product will help provide funding to Aquaculture Development for the Environment (ADE).

Click on the link below to go to our Donations Page and be part of the **RP2.0 ADE Project**
Your private donation will help secure its success.
